

“Your Eyes” Video Synopsis By Shirley Levi

Re-Bel Visionary Music proudly presents the first independent video made by Singer, Writer, Editor, Producer and Director, Shirley Levi. A powerful, mystical and unique music video based on a woman's ability to passionately inspire magical and spiritually awakening events in common people she comes in contact with. The special powers she channels from G-D, and creation are manifested through the headphones she receives in the beginning of her journey on the streets from a homeless DJ. She transfers her inspiration and energy by zapping people with the headphone chord like a magic wand, inspiring them to dance and to feel empowered. The video was shot in the streets and metro of Hollywood representing the *city of angels* where dreams and imagination can come to life after a series of tests we must initially pass. *The woman's temptations play a big role in her tests. She fights to keep inspirational headphones on*. Her fierce velocity and determination of spreading her inspiration and message through music and creation is replenished by passing it on to others.

A surreal music video that is naturally animated and rich in it's cinematic experience. Most of the scenes are shot completely spontaneously to display the irony and message of the video in a realistic and naturally invoked setting. Shirley Levi's mystical paintings are also featured throughout the video symbolizing running/existing in and out of the imagination.*
